HOW TO REGISTER AND LOG ONTO PALOMAR WEB SEMINARS

*All attendees must pre-register
for Palomar Web Events.*

TO REGISTER:

Please add webevent@palomarmedical.com to your list of approved sender addresses in your spam filter.

To register for upcoming web seminars, please visit www.palomarmedical.com/webseminars and click on the “Register Now!” link for the event you want to attend. Then fill out the required information on the registration form and click the “Submit” link.

You will be sent a **confirmation email** with the **1) event link, 2) log-on instructions** and **3) password**. Be sure to save this information — you will need it to log onto the web seminar on the day of the event!

TO LOG ON:

Access the confirmation or reminder email and click on the link to the event URL. This will bring you to the event. Enter your email address and password to gain entry.

Please log on to the event **up to 15 minutes** before the scheduled start time, and avoid using wireless internet connections.

When you enter the room, the system will prompt you to enter your phone number, and will dial your phone so you can hear the meeting.

*If you experience technical difficulty registering for or logging on to an event, please call **Adobe Acrobat Connect Pro** In-Meeting support **800-422-3623** (800-42-ADOBE) Available 24 hours a day, 7 days a week (toll-free US and Canada).*

PALOMAR® WEB SEMINARS

Our online seminars are a convenient way to hear from the experts so you can offer the most advanced treatments available. *Events are 60 minutes and include a Q&A session.*

SlimLipo™ : Reshaping Liposuction

Tuesday, March, 3, 2009 | 8:00 PM (EST)

Presenters: David Kent, M.D., Jeffrey Schafer, M.D., and Jeff Angobaldo, M.D.

David Kent, M.D.

Jeffrey Schafer, M.D.

Jeff Angobaldo, M.D.

After 10 years of research and development Palomar brings you SlimLipo, the first true body sculpting laser.

In previous web seminars we've presented the science behind SlimLipo's selective wavelengths and treatment tip design—how SlimLipo is the only laser that delivers energy at 924 nm and 975 nm for preferential absorption by fat and dermal tissue, respectively. Now, in “*SlimLipo: Reshaping Liposuction*” you can see the results and hear what expert users have to say—based on their extensive and collective experience.

Learn from skilled practitioners **David Kent, MD, Jeffrey Shafer, MD, and Jeff Angobaldo, MD** about how this exciting technology is re-shaping the liposuction industry.
